

GOLD NUGGETS

G.W.R.R.A.

REGION J — CHAPTER BC-A — VANCOUVER, BC

September 2008

What an exciting time to join the GWRR Vancouver Chapter! We have:

A new Special Interest Group (SIG) for the GWRR Association women, called ‘**Gold Wing Women.**’

While we love riding, this SIG gives women the chance to get together outside of riding activities and it provides an opportunity to socialize and enjoy the company of other women. Activities could include having a secret friend, special events, shopping in quaint villages, taking overnight trips, going to a movie, a spa, doing some charity work...or whatever interests the women. It will be very exciting to see how the ‘Gold Wing Women’ group evolves! (*more information on page 6*).

As well, we have **Vancouver Chapter events** and a riding schedule that continues all year long, weather permitting ...and great activities with our local chapters (see below).

Then, there’s the **Region ‘J’ Rally** which we are planning right now...and there’s ‘*a lot*’ of excitement around this! We have committees in place and we meet as a C.O.W (committee of the whole) once a month, we can always use more ideas and help.

*So, consider visiting us at our breakfast meeting, one of our events, or joining the Gold Wing Road Riders Association—**Vancouver Chapter!***

We’ve had another great month of riding, visiting with friends...and just over all fun.

We had the Backyard BBQ at John & Cathy’s house and what an awesome day it turned out to be! The Dunbar area and the trees surrounding the patio made for a very pleasant atmosphere and a much more moderate temperature than in the Valley that day.

Thank you so much again, John and Cathy, for hosting this event!

From there, we were off to the Gold Run in Merritt. Chapter BC-D did an outstanding job as usual and everyone had a great time! We got off to a slow start heading up to Merritt and when I say slow ... it took two hours to get from Chilliwack to Hope. I did enough clutch throttle practice to last me for the next couple of seasons. It was cool in Merritt this year and it hailed during the Poker Run, but the weather improved.

Chapter D had a couple of very interesting twists to the Bike Games and a Show ‘n ‘Tell.’ Imagine bike games done on foot and competing in the same event with two up on a motorcycle. I’m still not sure which method was better ... and the Show ‘n Tell took an unexpected twist, shiny bike and tell a story about it (or in our case maybe a whopper) ... what a blast!

The second meeting of the Wholly COW (Region J Rally Planning Committee) took place on Sunday Sep 14th. The energy, enthusiasm and work done by the committee members was fantastic! **“Thank you so much committee members!”** We still have lots to do and can use more ideas ... so come and join us for the next meeting on Oct. 5th from 4-6 p.m. (more details on page 10). New faces bring new ideas; everyone is welcome.

Coming events and the nice weather means there will be more fun to come.

Ride Safe

This is what Friends do for one another: Sent via E-mail

Hi,

Just sending a note along to the chapter to thank two of your members (Dave & his wife Terry) didn't get last name. Dave pulled over off the Hwy #1 just before Brunette exit Monday Sept 1 to see if he could help another biker. My Wife and I were pulled over to the side with a flat (completely flat) rear tire and were in the process of trying to fill the tire using the on board air. I couldn't see an apparent increase in pressure so was a little at a loss for a few minuets until eventually we saw the pressure gage move. We got the tire filled up and examined it for holes or any sort of damage. NONE found until I found that a slight pull on the valve stem allowed air loss (quite rapidly) from the rubber stem through the rim. I'm just a little miffed as I just had tires put on it and balanced at the local bike shop.. (should I say the name?) Any way the stem was stable enough and did not leak and we were able to make it all the way back to Aldergrove, (back streets) after dropping some stuff off to our daughter up on SFU campus. We very much appreciate the concern for another biker from two of your members as they put themselves in a position to render help if it turned out that we may have needed it... Thanks very much Dave. We may drop a note sometime and try to join you on a ride one day.

Cheers,

From Rob & Terry Ellis
Aldergrove.

Another happy pair of Goldwing drivers..

**Mark your calendars for the 2009—GWRRA Region 'J' Rally:
July 31—Aug 3, 2009 in Maple Ridge, BC**

...everyone is welcome; members and non-members.

Rally Information:

- ⇒ Approximate attendance: 300 members
- ⇒ Located at the Maple Ridge Fairgrounds, 40 minutes east of Vancouver
- ⇒ Camping available on site, *more information available soon*
- ⇒ Motel rooms blocked; *more information available soon*
- ⇒ Early Bird Registration Draw
- ⇒ Great Tours, Great Scenery; Grand Prize Draw, Door Prizes, Activities Just for Women...*and more events to be announced!*

The August 50/50 at our Chapter Meeting was won by Carly Smith (Ian & Kathie McAlpine's Granddaughter) (\$42.) The August/08 Membership Draw was won by Ivan Armstrong. Congratulations!!
Newsletter Articles please.

There are some 50/50 & Membership Draw articles still owed. Please send Articles in to The Editor. Thanks

We are still in need of members to help sell advertising space in our newsletter. Please let us know if you wish to help or you could give

AN INTERESTING HISTORY LESSON ON RAILROAD TRACKS.

This is fascinating. Be sure to read the final paragraph; your understanding of it will depend on the earlier part of the content.

The US standard railroad gauge (distance between the rails) is 4 feet, 8.5 inches. That's an exceedingly odd number. Why was that gauge used? Because that's the way they built them in England, and English expatriates built the US railroads.

Why did the English build them like that? Because the first rail lines were built by the same people who built the pre-railroad tramways, and that's the gauge they used.

Why did 'they' use that gauge then? Because the people who built the tramways used the same jigs and tools that they used for building wagons, which used that wheel spacing.

Why did the wagons have that particular odd wheel spacing? Well, if they tried to use any other spacing, the wagon wheels would break on some of the old, long distance roads in England, because that's the spacing of the wheel ruts.

So who built those old rutted roads? Imperial Rome built the first long distance roads in Europe (and England) for their legions. The roads have been used ever since.

And the ruts in the roads? Roman war chariots formed the initial ruts, which everyone else had to match for fear of destroying their wagon wheels. Since the chariots were made for Imperial Rome, they were all alike in the matter of wheel spacing. Therefore the United States standard railroad gauge of 4 feet, 8.5 inches is derived from the original specifications for an Imperial Roman war chariot. Bureaucracies live forever.

The Gold Wing WOMEN

...a new, Special Interest Group for the women of the Vancouver GWRRA Chapter.

- ⇒ Women are busy (as we all know...and much, much, MUCH busier than men!!!) We're just so busy multi-tasking that it's amazing we can function at all!
- ⇒ Women don't have a lot of 'free time' - we're doing everything for everyone else, or for this project or that project....so it seems. Sometimes we get too busy!
- ⇒ Women 'may' need to relax and look after themselves (if not pamper themselves... like at a SPA - *and very, very often*)
- ⇒ However, in saying that...other women aren't as busy, or as social or as involved as they'd like to be.
- ⇒ Some like to exercise, enjoy nature; participate in charitable activities of one kind or another; organize activities or events and
- ⇒ Some girls, just want to have fun!!

Knowing all this... I wonder if there's an interest in forming a Vancouver Chapter 'Gold Wing Women' - Special Interest Group to meet some of our needs - the needs mentioned above, or needs I didn't even mention.

So... this would be a group of Gold Wing Women that would meet regularly.... as schedules allow. This would be a time to have fun, relax, socialize...*not a 'make work' project!*

Please contact me if you're interested in forming a group—or if you're interested in planning activities.

If there's an interest...it'll happen!

lesliewart@shaw.ca or 604-669-9248

(Gold Wing Women from other Chapters are most welcome to join us!)

We're NOT getting older, that's for sure ...
but this prayer 'might ' be good.

Now I lay me down to sleep
I pray the Lord my shape to keep.
Please no wrinkles
Please no bags
And please lift my butt before it sags.
Please no age spots
Please no gray
And as for my belly, please take it away.

Contributions to The Gold Wing Women section of the newsletter are both welcomed and encouraged!

Continued from page 5

So the next time you are handed a Specification/ Procedure/Process and wonder 'What horse's behind came up with it?' you may be exactly right. Imperial Roman army chariots were made just wide enough to accommodate the rear ends of two war horses. (two horses' behinds.) Now, the twist to the story:

When you see a Space Shuttle sitting on its launch pad, there are two big booster rockets attached to the sides of the main fuel tank. These are solid rocket boosters, or SRB's. The SRB's are made by Thiokol at their factory in Utah . The engineers who designed the SRB's would have preferred to make them a bit fatter, but the SRB's had to be shipped by train from the factory to the launch site. The railroad line from the factory happens to run through a tunnel in the mountains, and the SRB's had to fit through that tunnel. The tunnel is slightly wider than the railroad track, and the railroad track, as you now know, is about as wide as two horses' behinds.

So, a major Space Shuttle design feature of what is arguably the world's most advanced transportation system was determined over two thousand years ago by the width of a horse's behind. And you thought being a horse's behind wasn't important? Ancient horses' behinds control almost everything... and CURRENT horses behinds are controlling everything else.

Tuesday Night Rides

Tuesday nights are great for socializing.

TIM HORTON'S ANNACIS ISLAND

Rides start about 6:30 – 7:00 pm

Hope to see you there.

Carly's Article

My trip to British Columbia is one that I will not soon forget. Not only did I attend a few Gold Wing's meetings but I also went to the Gastown Show and Shine and had a blast. I got to see some amazing bikes, and some that I didn't think were so amazing. I guess you could say that they just weren't up my alley. Apart from all of this motor cycle talk. I enjoyed my trip to B.C. because I got to visit with my grandmother and my grandpa. It is very rare that I see them due to the fact that me and my dad, Robert, live in Orangeville, Ontario. And this trip was all possible with the careful planning of my daddy. I am excited to go home on the 27th, but I am sad to go. I miss my dad and my friends. But I will miss my grandparents because I am not sure when I will see them next. I wish to thank Cathy when it came to my nose bleed on the ride she seemed to be the one who knew what to do. After all she is a nurse. I would like to thank my grandpa, Ian for bringing me on the trips to Gastown and all over. I'd like to thank everyone I met. You were so nice and I am glad I met you. I'd like to thank my grandmother, Kathie for putting up with me for two weeks. I wish you all the best in the future and once again thank you for your kindness. Oh and Cathy, your cheque is in the mail. I'm sorry I made you work on your day off.

Carly Smith (Ian & Kathie McAlpine's Granddaughter)

A Question for all of us:

I had someone ask me, what sort of experiences some of us have encountered that would help the less weathered riders. You know, like glancing in advance at the road where you will stop and put down your foot to ensure that it's fairly level and not a big dip.

Nothing worse than putting down your foot and not finding the road or finding sand. If they new what to watch for, we might be able to help prevent some nasty things from happening to some riders. So I thought I would ask any of our members to e-mail some of their own answers to this question and I'll put them in The Golden Nuggets Newsletter.

Thanks Dan Fortin

The guys were having a discussion on traffic. Here's the lay out. If a rider comes up to a traffic light in which the lights are triggered by ground sensors. He/she is on the less travelled direction (which means a constant red). Now some people are not fully aware of these road markings (this person is off to the side of the markings). How long should/can this rider wait before they go on a red light (no traffic coming or going left or right)?

From Dave Hay—Assistant International Director Rider Education Canada (and a RCMP Officer)

The options you have are.. 1) wait till nobody else is around & run the light, 2) move the bike back & forward over the sensors till it triggers, 3) put the kickstand down and shut the engine off & restart it (this sometimes generates enough electrical current that the system sees the bike), 4) get off and hit the crosswalk button, 5) make a right turn, do a u-turn somewhere & come back thru the light from the other main road.

The legal answer is "never" run it, as you would be considered running a red light and would receive \$167 ticket, you should use one of the other options.

Life is good & full of promise.

Dave & Anne

**Please remember to
ride safe!**

**The number of motorcycles on the
road has increased and
unfortunately so has the number
of motorcycle accidents. I cringe
every time I hear a report on the
radio.**

Great performance never looked so good.
 Too bad the others will only get to admire it from behind.

The Honda Gold Wing is the ultimate touring motorcycle – the one by which all others are measured. With an in-dash navigation system, premium audio system, heated seat and hand grips, sleek styling and other features, it's in a class of its own. No matter what your destination, when you ride a Gold Wing, you've arrived.
