[BOOK AN ESTIMATE](#)

Saturday April 6th 174 Pemberton Ave, North Vancouver

Once a year Chuck is kind enough to open up his shop so that we can do a little routine maintenance.

Need to change your oil? Have a burnt out bulb? Bring your parts and tools to Chucks place. It's warm and dry. There is usually someone they're with an extra wrench or two if you forget something. Some of our members are a wealth of information, and can usually help you out with some minor repair's .

Donuts and Muffins will be provided, and you'll most likely find a pot of coffee.

Time: 9:00 a.m. till noon

Saturday April 6th 174 Pemberton Ave, North Vancouver

SILENT Auction

We are thrilled to announce a day of giving back, connection, and fun! Chapter BC-A is hosting a Silent Auction by Donation, and you're warmly invited to be part of this special event. Your participation and generosity will directly support Chapter BC-A's future events.

Any sale items can be dropped off on Friday April 5th if you prefer

 **Date & Time:** Saturday April 6th from 9:00 a.m. till noon.

 **Location:** Taylormotive 174 Pemberton Ave, North Vancouver

Coffee and snacks will be provided

What to Expect:

- **Bid:** Bid on a variety of donated items, all kindly provided by Chapter members.
- **Heartfelt Contributions:** 100% of the proceeds will directly benefit the Chapter, enabling us to continue with special events.
- **Connect & Celebrate:** Enjoy a day with friends. This event is combined with the ever popular Bike Maintenance Day

How You Can Contribute:

- **Donate an Auction Item:** If you have an item or service to donate for the auction, please contact me at Bill Morrill at 604 862-4780 or bring it with you on the day of the event. Your generous contributions are what make our auction a success!
- **Spread the Word:** Share this invitation with other group members who might be interested in supporting a great cause and enjoying a wonderful day.

Your support makes a world of difference, and we can't wait to see you there. For any questions or further information, please don't hesitate to reach out to me at 604 862-4780.

Thank you for your generosity and support. Let's make this event a memorable success!

Any sale items can be dropped off on Friday April 5th if you prefer

Chapter BC-A Swap Meet

Date: Saturday April 6th

Time: 9:00 a.m till noon.

Location: Taylormotive 174 Pemberton Ave, North Vancouver

Any sale items can be dropped off on Friday April 5th if you prefer

Coffee and snacks will be provided

Whether you're looking to declutter, find new treasures, or simply enjoy a day out with like-minded Chapter members, our Swap Meet is the place to be. This event is not just about swapping goods; it's about coming together as a group to support the Chapter

How It Works:

- **Bring Items to Swap:** Anything goes.
- **Make a Donation:** Set your price, 20% of the sale price will be donated to Chapter BC-A
- **Enjoy the Spirit:** Beyond swapping, enjoy some light refreshments.

What to Bring:

- Items in good condition for swapping
- Your generous spirit and a smile 😊

Please Note:

- You are responsible to remove all remaining items at the end of the swap meet.
- To ensure a positive experience for everyone, we kindly ask that all items are in a condition that respects the next owner.

For more details, please contact Bill Morrill 604 862-4780.

The Amazing Ride 2.0 - May 26, 2024

"I'm Riding" in support of prostate cancer!

Prostate cancer is the #1 cancer for men and the second leading cause of cancer death. 1 in 8 men will be diagnosed with prostate cancer in their lifetime.

PCFC provides critical support and resources to men with prostate cancer. This grassroots organization has been around for 25 years and keeps expanding its services and grant research funding. They are only able to provide these services because of your continued commitment to the Ride to Live.

I will continue to ride and fundraise; but it's not enough. I need your help now more than ever. As we move closer to the Ride to Live, I am asking you to step up the fight against prostate cancer and support the men you love.

HOW CAN YOU HELP?

Support me and make a donation to Prostate Cancer Foundation Canada's Annual Ride To Live for Prostate Cancer via my personal web page below.

WHY AM I PARTICIPATING IN THE RIDE TO LIVE?

Because this event is for the tens of thousands of Canadian men living courageously with prostate cancer and their families. It's for all the men who have died from this disease and the families who have lost loved ones. It's for the roughly 26,000 men who will be diagnosed in 2024 and everyone who cares about them.

Top Touring Motorcycles

Luxury Touring

HONDA GOLDWING TOUR | \$35.253

The **2023 Honda Gold Wing DCT Tour** is a pinnacle of touring motorcycle innovation, embodying comfort, luxury, and advanced technology. The Gold Wing has long been revered in the touring segment for its exceptional ride quality, reliability, and capability to cover vast distances with ease. The DCT (Dual Clutch Transmission) variant enhances the riding experience with its seamless gear changes and ease of use, making it a preferred choice for many long-distance riders and tourers. Here's a breakdown of its key features, specifications, and what

makes it stand out in the touring motorcycle category.

Engine and Performance

- **Engine:** The bike is powered by a 1,833 cc horizontally opposed six-cylinder engine, known for its smooth and powerful output. This engine design contributes to the bike's low center of gravity, improving handling and stability.
- **Power Output:** While specific numbers can vary by market, the engine typically delivers around 125 horsepower and 170 Nm (125 lb-ft) of torque, providing ample power for highway cruising, overtaking, and fully loaded touring.
- **Transmission:** The DCT version features Honda's advanced Dual Clutch Transmission, offering automatic gear changes and a manual mode controlled by handlebar-mounted buttons. This system provides a smooth and efficient ride, reducing rider fatigue on long journeys.

Comfort and Convenience

- **Riding Position:** The Gold Wing DCT Tour is designed for comfort, with a spacious and ergonomically designed rider and pillion seating area, lower seat height, and adjustable controls.
- **Storage:** It comes with generous storage options, including a centrally located fuel tank for improved weight distribution, and integrated panniers and a top box on the Tour model, providing ample space for luggage.
- **Infotainment and Connectivity:** A sophisticated infotainment system with a large, clear TFT screen offers navigation, Bluetooth connectivity for phone and music, Apple CarPlay, Android Auto integration, and a high-quality audio system.

Technology and Safety

- **Rider Aids:** Equipped with Honda's comprehensive suite of rider aids, including selectable ride modes (Tour, Sport, Econ, and Rain), traction control, and Honda Selectable Torque Control (HSTC) for enhanced traction.
- **Suspension:** The Gold Wing DCT Tour features a double-wishbone front suspension system and Pro Arm rear suspension, offering a plush ride and reducing rider fatigue. The suspension is electronically adjustable, allowing riders to fine-tune their setup.
- **Brakes and Safety Features:** It is equipped with an advanced braking system, including anti-lock brakes (ABS) and an electronically controlled combined braking system, ensuring optimal braking performance under various conditions.

Design and Styling

- The 2023 Honda Gold Wing DCT Tour maintains its sleek, modern design, with aerodynamic lines that not only enhance its aesthetic appeal but also improve wind protection for the rider and passenger.
- LED lighting is used throughout for better visibility and lower energy consumption.

Price and Availability

- As a premium offering in the touring segment, the Gold Wing DCT Tour comes with a price tag that reflects its extensive features and capabilities. Pricing can vary by market, and for the most accurate and current information, it's recommended to check with local Honda dealerships.

In summary, the 2023 Honda Gold Wing DCT Tour represents the zenith of motorcycle touring luxury and technology. It is designed for riders seeking a no-compromise touring machine that offers unparalleled comfort, sophisticated technology, and effortless performance over long distances.

BMW K 1600 GL | \$32,148

The **BMW K 1600 GTL** is a luxury touring motorcycle designed for long-distance travel with a focus on comfort, performance, and technology. As part of the K 1600 lineup, the GTL variant is engineered to deliver a premium riding experience with an emphasis on touring capabilities. Here are some key features and specifications:

Engine and Performance

- **Engine Type:** The K 1600 GTL is powered by a 1,649 cc, inline-six engine, known for its smooth performance and substantial power output. This configuration is relatively rare in the motorcycle world, offering a unique balance of power delivery and refinement.
- **Power Output:** The engine produces a generous amount of power and torque, typically around 160 horsepower and over 130 Nm (95 lb-ft) of torque, ensuring the motorcycle has ample performance for highway cruising and overtaking maneuvers.
- **Transmission:** It is equipped with a 6-speed gearbox that provides smooth and precise shifting, complemented by a shaft drive for low maintenance and smooth power delivery.

Comfort and Convenience

- **Ergonomics:** The K 1600 GTL features a relaxed riding position, with ergonomically designed seats for both the rider and the passenger, ensuring comfort during long rides. The handlebar positioning is also designed to reduce rider fatigue.
- **Adjustable Features:** It offers electronically adjustable suspension (Dynamic ESA), providing riders with the ability to fine-tune the ride settings for optimal comfort and handling depending on the load and riding conditions.
- **Wind Protection and Fairing:** A large, electrically adjustable windshield and ample fairing help protect riders from wind and weather, improving comfort over long distances.

Technology and Safety

- **Rider Aids:** The motorcycle comes equipped with a range of advanced rider aids, including multiple riding modes (Rain, Road, Dynamic, etc.), traction control, and ABS Pro for enhanced safety across various riding conditions.
- **Connectivity:** A full-color TFT display serves as the control hub for navigation, entertainment, and vehicle settings. The K 1600 GTL also often includes Bluetooth connectivity, allowing riders to connect their devices for music, calls, and navigation.
- **Lighting:** LED lighting is used throughout, including adaptive headlights that improve visibility during nighttime rides by adjusting the light beam according to lean angle.

Design and Styling

- The K 1600 GTL is designed with a focus on luxury and presence. Its styling reflects its status as a top-tier touring motorcycle, with high-quality finishes, materials, and a sleek, aerodynamic silhouette.

Price and Availability

- Being a premium motorcycle, the K 1600 GTL comes with a premium price tag. Prices vary by market, but they generally start in the high-end range of the motorcycle market. For the most accurate and current pricing, it's best to check with local BMW Motorrad dealerships.

Overall, the 2023 BMW K 1600 GTL represents the pinnacle of touring motorcycle luxury and technology, designed for riders seeking the ultimate long-distance riding experience.

Harley-Davidson Road Glide Limited | \$42,249

The **Harley-Davidson Road Glide Limited** is a premium touring motorcycle that embodies the American motorcycle manufacturer's heritage of creating iconic, long-distance, luxury touring bikes. Known for its distinctive style, comfort, and road presence, the Road Glide Limited is designed for riders seeking a top-of-the-line touring experience. It combines advanced technology, powerful performance, and

unmatched comfort for

both the rider and passenger, making it an ideal choice for cross-country adventures and leisurely rides alike.

Engine and Performance

- **Engine:** The Road Glide Limited is powered by the Milwaukee-Eight® 114 engine. This V-twin engine has a displacement of 1,868 cc (114 cubic inches) and is known for its massive torque output, smooth power delivery, and the iconic Harley-Davidson rumble.
- **Power Output:** While Harley-Davidson traditionally focuses on torque rather than outright horsepower, the Milwaukee-Eight® 114 engine is renowned for its strong low-end torque, providing effortless acceleration and cruising capability. The engine is capable of producing around 100 horsepower and 160 Nm (118 lb-ft) of torque.
- **Transmission:** It comes with a 6-speed Cruise Drive® transmission that offers smooth and quiet shifting, complemented by a final belt drive that is low maintenance and delivers smooth power delivery.

Comfort and Convenience

- **Ergonomics:** The Road Glide Limited features a frame-mounted shark nose fairing, which is distinctive and offers excellent wind and weather protection. The bike also has a comfortable, upright riding position with floorboards and a passenger seat with a backrest, making long rides more comfortable for both the rider and passenger.
- **Infotainment:** It's equipped with the Boom!™ Box GTS infotainment system, which includes a color touch screen, GPS navigation, Bluetooth connectivity, and a powerful sound system. The system is designed for ease of use, even with gloves on.
- **Storage:** For touring convenience, it offers generous storage capacity with one-touch opening saddlebags and a Tour-Pak® luggage carrier, providing ample space for gear and essentials on long trips.

Technology and Safety

- **Rider Aids:** The Road Glide Limited comes with a range of standard and optional rider aids, including the Reflex™ Defensive Rider Systems (RDRS), which offer features such as traction control, ABS, and vehicle hold control, enhancing rider confidence in various conditions.

- **Suspension:** It features high-performing front and rear suspension with easily adjustable rear shocks, allowing riders to dial in their preferred handling and comfort levels.

Design and Styling

- The Road Glide Limited boasts a bold, commanding presence on the road, characterized by its distinctive fairing, classic lines, and ample chrome. It's available in a variety of colors and finishes, including options for custom paint.
- LED lighting is used throughout, including headlamps, tail lamps, and turn signals, providing excellent visibility and adding to its modern aesthetic.

Price and Availability

- As Harley-Davidson's premium touring motorcycle, the Road Glide Limited commands a premium price point, which varies by market and selected options. For the most accurate pricing, availability, and customization options, prospective buyers should visit their local Harley-Davidson dealership.

In summary, the 2023 Harley-Davidson Road Glide Limited stands out as a luxury touring motorcycle that combines classic Harley-Davidson style with modern technology and performance. It is designed for riders seeking the ultimate in comfort, performance, and style for their long-distance adventures.

2023 Indian Pursuit Limited | \$30,899

The **Indian Pursuit Limited** is a luxury touring motorcycle that combines modern technology, performance, and classic styling, setting a high standard in its category. Indian Motorcycle, America's first motorcycle company, has infused this model with a blend of traditional design elements and cutting-edge features to cater to the long-distance tourer who seeks comfort, style, and performance. The Indian Pursuit Limited

is directly competitive in the segment populated by other touring giants like the Harley-Davidson Road Glide and the Honda Gold Wing

Engine and Performance

- **Engine:** The heart of the Indian Pursuit Limited is the PowerPlus engine, a 108 cubic inch (1,768 cc) liquid-cooled, 60-degree V-twin, known for its impressive power output and torque.
- **Power Output:** It delivers a robust performance with approximately 122 horsepower and 178 Nm (131 lb-ft) of torque, providing brisk acceleration and ample power for highway cruising, even when fully loaded.
- **Transmission:** The engine is paired with a smooth-shifting 6-speed transmission with overdrive, plus a true overdrive sixth gear for relaxed highway cruising speeds, improving fuel efficiency and reducing engine noise.

Comfort and Convenience

- **Riding Position:** The Pursuit Limited offers a comfortable, relaxed riding position with floorboards, an adjustable windscreen, and ergonomically designed controls, making long rides more enjoyable.
- **Storage:** It comes equipped with spacious, weatherproof saddlebags and a powered trunk, offering ample storage capacity for touring necessities. The storage compartments are easily accessible and secure, providing peace of mind for riders.
- **Infotainment:** The motorcycle features the Indian Ride Command system, which includes a large, glove-compatible touchscreen display with navigation, Bluetooth connectivity, a powerful audio system, and smartphone compatibility for music, calls, and app integration.

Technology and Safety

- **Rider Aids:** Advanced rider aids include multiple ride modes (Tour, Standard, and Sport) that adjust the bike's throttle mapping, traction control, and ABS to suit different riding conditions and preferences.
- **Suspension:** Air-adjustable rear suspension allows riders to fine-tune the bike's handling and ride comfort according to the load and road conditions, enhancing the overall touring experience.
- **Lighting:** Full LED lighting ensures excellent visibility and contributes to the bike's modern, premium appearance.

Design and Styling

- The Indian Pursuit Limited showcases a blend of classic and contemporary design elements, featuring sweeping lines, a full front fairing, and integrated hard cases. Its design is both functional and aesthetically pleasing, reflecting Indian Motorcycle's attention to detail and heritage.
- Customizable options and accessories are available to personalize the motorcycle, including different color schemes, additional chrome or blackout treatments, and various comfort and convenience accessories.

Price and Availability

- As a premium touring model, the Indian Pursuit Limited comes with a premium price tag, reflecting its position in the market as a top-tier luxury tourer. Pricing may vary based on location, dealer, and optional equipment. For the most current pricing and availability information, prospective buyers should contact their local Indian Motorcycle dealership.

In summary, the 2023 Indian Pursuit Limited is a highly capable and luxurious touring motorcycle that offers an exceptional blend of performance, comfort, and style. It's built for riders who demand the best in long-distance touring capabilities, without compromising on performance or the classic American motorcycle aesthetic.

Sport Touring

Kawasaki Ninja H2 SX SE | \$33,794

The **Kawasaki Ninja H2 SX SE** is a high-performance sport-touring motorcycle that blends the exhilarating performance of the Kawasaki H2 line with the comfort and technology needed for long-distance touring. This model stands out for its supercharged engine, advanced electronics, and premium features aimed at riders looking for a thrilling yet comfortable ride. Here are some key aspects and specifications of the bike:

The 2023 Kawasaki Ninja H2 SX SE is a high-performance sport-touring motorcycle that blends the exhilarating performance of the Kawasaki H2 line with the comfort and technology needed for long-distance touring. This model stands out for its supercharged engine, advanced electronics, and premium features aimed at riders looking for a thrilling yet comfortable ride. Here are some key aspects and specifications of the bike:

Engine and Performance

- **Engine:** At the heart of the Ninja H2 SX SE is a 998cc liquid-cooled, 4-stroke, in-line four-cylinder DOHC engine equipped with Kawasaki's proprietary supercharger technology. This setup is designed to deliver both incredible power and efficiency, making it suitable for high-speed touring.
- **Power Output:** The supercharged engine is known for its remarkable power output, delivering exhilarating acceleration and top-end performance. While exact numbers can vary, the engine typically produces in the vicinity of 200 horsepower and significant torque, ensuring robust performance at any speed.
- **Transmission:** It features a 6-speed gearbox with Kawasaki Quick Shifter (KQS) for smooth and quick gear changes without the need to use the clutch.

Comfort and Convenience

- **Ergonomics:** The Ninja H2 SX SE offers a sporty yet comfortable riding position, balancing the demands of sport riding with the need for touring comfort. It includes adjustable handlebars and footpeg positions to accommodate various rider sizes and preferences.
- **Wind Protection:** The bike comes with a large, adjustable windscreen and aerodynamically designed bodywork that provides excellent wind protection, reducing rider fatigue during long rides.

Technology and Safety

- **Advanced Rider Aids:** The Ninja H2 SX SE is equipped with Kawasaki's latest electronic rider aids, including Kawasaki Cornering Management Function (KCMF), multiple riding modes, Kawasaki Traction Control (KTRC), and Kawasaki Intelligent anti-lock Brake System (KIBS), enhancing rider confidence in various conditions.
- **Electronic Suspension:** This model features Kawasaki Electronic Control Suspension (KECS), which adjusts damping in real time based on riding conditions, ensuring optimal comfort and performance.

- **TFT Display:** A full-color TFT display provides the rider with critical information and allows for smartphone connectivity via Bluetooth, enabling access to navigation, calls, music, and more through the Kawasaki Rideology app.

Design and Styling

- The Ninja H2 SX SE is designed with a distinctive, aggressive look, incorporating the H2 family's signature styling cues, such as the aerodynamic bodywork and the Kawasaki River Mark. The bike also features high-quality finishes and LED lighting all around, including cornering lights that improve visibility when turning.

Price and Availability

- Being a high-end model with cutting-edge technology and performance, the 2023 Kawasaki Ninja H2 SX SE comes with a premium price tag. Prices can vary based on location, dealer inventory, and any additional accessories or packages chosen by the buyer. For the most accurate and up-to-date pricing, it's recommended to check with local Kawasaki dealerships.

The 2023 Kawasaki Ninja H2 SX SE represents a unique blend of supercharged performance, advanced technology, and touring capability, making it one of the most exciting and capable sport-touring motorcycles on the market.

BMW R1250 RT | \$19,695

The **BMW R1250 RT** is a premium touring motorcycle that blends dynamic performance with supreme comfort and state-of-the-art technology. It's designed for riders who seek a high level of comfort and sophistication for long-distance travel, without sacrificing the engagement and excitement of riding. The R1250 RT stands out in its segment with its boxer engine, innovative features, and comprehensive suite of electronics aimed at enhancing the touring experience.

Engine and Performance

- **Engine:** At the heart of the R1250 RT lies BMW's renowned 1,254 cc air/liquid-cooled, two-cylinder boxer engine equipped with BMW ShiftCam Technology, which varies the valve timing and valve stroke on the intake side for improved power delivery across the entire rev range.
- **Power Output:** The engine produces 136 hp (100 kW) at 7,750 rpm and 143 Nm (105 lb-ft) of torque at 6,250 rpm, ensuring ample power and smooth acceleration for highway cruising and overtaking maneuvers.
- **Transmission:** It is paired with a six-speed gearbox that delivers smooth and precise gear changes. A shaft drive transmits power to the rear wheel, offering a low-maintenance and clean solution perfect for long-distance touring.

Comfort and Convenience

- **Riding Position:** The R1250 RT offers an upright and comfortable riding position with ergonomically designed controls and a height-adjustable seat, making it suitable for long hours in the saddle.
- **Wind and Weather Protection:** A large, electrically adjustable windshield provides excellent protection against the elements, while the aerodynamic fairing helps to reduce turbulence for a smoother ride.
- **Storage:** Equipped with spacious, waterproof panniers as standard, the bike offers ample storage for touring essentials. The top case is usually an optional accessory for those needing additional storage.

Technology and Safety

- **Rider Aids:** The R1250 RT comes with a comprehensive package of electronic rider aids, including ABS Pro, Dynamic Traction Control (DTC), and Dynamic Brake Control (DBC), enhancing rider safety in various conditions. Multiple riding modes adjust the bike's performance to suit different riding conditions and preferences.
- **Connectivity and Infotainment:** A key highlight is the 10.25-inch full-color TFT display with BMW Motorrad Connectivity, providing navigation, ride information, and entertainment options. The system supports Bluetooth connectivity, allowing for easy integration of a smartphone and helmet communication systems.
- **Adaptive Headlight:** The R1250 RT can be equipped with an adaptive headlight that improves night-time visibility by adjusting the light beam according to lean angle, enhancing safety during night rides.

Design and Styling

- The BMW R1250 RT features a sleek, aerodynamic design characterized by its distinctive front fairing and integrated panniers. The design is both functional and aesthetically pleasing, ensuring a commanding presence on the road.

Price and Availability

- As a premium offering in the touring motorcycle segment, the BMW R1250 RT commands a premium price, reflecting its advanced technology,

Yamaha FJR1300ES | \$21,474

The **Yamaha FJR1300ES** is a revered model in the sport-touring motorcycle segment, known for its blend of performance, comfort, and technology. It has been a popular choice for riders looking for a motorcycle that can handle long-distance touring with the agility and excitement of a sportbike. The FJR1300 series has been around since 2001, with Yamaha making continuous improvements over the years to keep it at the forefront of the sport-touring category.

Key Features of the 2023 Yamaha FJR1300ES

Engine and Performance

- **Engine:** The FJR1300ES is powered by a 1,298cc liquid-cooled, inline-four engine. This engine is known for its reliability, smooth power delivery, and ample torque across a wide range of RPMs, making it well-suited for both spirited riding and cruising.
- **Power Output:** It produces a substantial amount of power, typically over 140 horsepower, and torque that ensures brisk acceleration and strong highway passing capabilities.
- **Transmission:** The FJR1300ES comes with a 6-speed transmission that provides smooth and precise gear shifts. An assist-and-slipper clutch is featured for smoother downshifts and reduced lever effort.

Comfort and Convenience

- **Adjustable Ergonomics:** The FJR1300ES features an electronically adjustable windscreen, adjustable seat height, and handlebars that can be repositioned to suit the rider's preference, enhancing comfort over long distances.
- **Electronic Suspension:** The "ES" in its name denotes the electronic suspension adjustment feature, allowing riders to easily adjust the suspension settings (preload and damping) to match load conditions and riding preferences, all done through the handlebar-mounted controls.

Technology and Safety

- **Rider Aids:** Equipped with traction control and cruise control as standard, the FJR1300ES enhances the riding experience by providing added stability and comfort on long rides.
- **LED Lighting:** The motorcycle features LED headlights, tail light, and turn signals for improved visibility and reduced power consumption.

Design and Styling

- The Yamaha FJR1300ES sports a sleek, aerodynamic design with an emphasis on rider and passenger comfort. Integrated hard side cases come standard, providing practical storage solutions for touring.

Price and Availability

- As a premium sport-touring motorcycle, the FJR1300ES is priced accordingly, reflecting its advanced features, performance, and technology. Prices can vary based on location, dealer inventory, and any additional accessories or packages chosen by the buyer.

It's worth noting that Yamaha announced the FJR1300 line's discontinuation in some markets due to evolving emission standards and market trends, with 2021 being its final model year in certain regions. However, remaining inventory might still be available for sale, and the bike continues to be celebrated for its legacy in the sport-touring world. For the most current information regarding availability, specifications, and pricing, it's best to check directly with Yamaha dealerships or Yamaha's official website.

2023 Suzuki GSX-S1000GT | \$17,900

The **Suzuki GSX-S1000GT** marks Suzuki's ambitious entry into the sport-touring motorcycle segment, blending high-performance attributes with touring capabilities. It builds upon the success of the GSX-S1000 platform, known for its aggressive streetfighter style and performance, by adding features designed for long-distance comfort and convenience without sacrificing the thrill of riding a sport-oriented motorcycle. This model represents a significant evolution, aiming to offer a balanced mix of

sportiness, comfort, and technological sophistication.

Engine and Performance

- **Engine:** The GSX-S1000GT is powered by a 999cc, liquid-cooled, inline-four engine derived from the legendary GSX-R1000. This engine is designed to deliver a broad wave of torque for exhilarating acceleration and a smooth power delivery that's well-suited for both spirited riding and cruising.
- **Power Output:** While Suzuki has fine-tuned this engine for the GT to emphasize low-to-mid range torque, it still boasts a high horsepower output, typically around 150 hp, and offers a peak torque figure in the vicinity of 108 Nm (79.7 lb-ft), ensuring robust performance across the rev range.
- **Transmission:** It is mated to a 6-speed transmission that provides crisp, efficient shifts, complemented by a quick shifter for seamless upshifts and downshifts without the clutch, enhancing the riding experience.

Comfort and Convenience

- **Ergonomics:** The GSX-S1000GT features a more upright seating position compared to its pure sportbike counterparts, with handlebars positioned to offer a comfortable reach, reducing rider fatigue over long distances. The seat design and positioning are also optimized for both rider and passenger comfort.
- **Wind Protection:** A large, aerodynamically designed windshield and fairings provide effective wind and weather protection, making high-speed cruising more comfortable.
- **Luggage:** While the base model might not come with hard luggage as standard, Suzuki offers matching side cases as part of the accessories range, allowing riders to equip the GSX-S1000GT for weekend tours or longer adventures.

Technology and Safety

- **Electronics:** The bike comes equipped with an advanced electronics package, including traction control, multiple riding modes, and Suzuki's Intelligent Ride System (S.I.R.S.), offering riders customizable settings to suit various riding conditions and preferences.
- **Connectivity:** A standout feature is the full-color TFT instrument panel that supports smartphone connectivity via Bluetooth, allowing riders to manage navigation, calls, music, and other functions through the display.
- **Lighting:** Full LED lighting enhances visibility and contributes to the motorcycle's modern, aggressive aesthetic.

Design and Styling

- The GSX-S1000GT showcases a sleek, sporty design that aligns with its performance capabilities. The styling is sharp and futuristic, with an emphasis on aerodynamics and rider ergonomics. The color options and graphic schemes available for the 2023 model highlight its premium positioning in the Suzuki lineup.

Price and Availability

- Positioned as a premium offering in the sport-touring segment, the 2023 Suzuki GSX-S1000GT is competitively priced to appeal to riders looking for a high-performance touring motorcycle that doesn't compromise on sportiness or comfort. Pricing may vary based on location, dealer, and any additional accessories or options selected.

In summary, the 2023 Suzuki GSX-S1000GT is engineered to appeal to riders who desire a motorcycle that combines the heart-pounding performance of a sportbike with the comfort and features of a touring bike. It stands out in the market with its blend of performance, technology, and versatility, making it a strong contender in the sport-touring segment.

Adventure Bikes

2023 Ducati Multistrada V4 Rally | \$33,995

The **Ducati Multistrada V4 Rally** expands Ducati's adventurous spirit by pushing further into the realm of adventure touring. This model builds on the foundation laid by the already versatile and technologically advanced Multistrada V4 platform, introducing enhancements aimed at improving long-distance comfort and off-road capability. The Multistrada V4 Rally is designed for riders who demand a high-performance, multi-terrain motorcycle that doesn't compromise on comfort or cutting-edge

features over long journeys or when tackling challenging terrains.

Engine and Performance

- **Engine:** The heart of the Multistrada V4 Rally is Ducati's V4 Granturismo engine, a 1,158cc, 90-degree V4 that's known for its smooth power delivery and impressive performance. This engine is characterized by its counter-rotating crankshaft and Twin Pulse firing order, designed to provide a blend of strong low-end torque and high-end power.
- **Power Output:** It produces 170 horsepower and 125 Nm (92 lb-ft) of torque, figures that ensure the Multistrada V4 Rally is capable of spirited on-road performance as well as competent off-road behavior.
- **Transmission:** A 6-speed gearbox equipped with Ducati's Quick Shift (DQS) up/down system facilitates seamless gear changes, enhancing the riding experience both on and off the pavement.

Comfort and Convenience

- **Suspension:** The Multistrada V4 Rally features sophisticated electronically controlled Skyhook suspension, which automatically adjusts damping to suit the terrain and riding conditions, providing a plush ride on highways and effective control on rough trails.
- **Ergonomics:** A focus on rider and passenger comfort is evident in the ergonomic design, with a comfortable seat, adjustable windscreen, and handguards being standard. The riding position is tailored to support both dynamic riding and long hours in the saddle with minimal fatigue.
- **Luggage System:** While specific details might vary, Ducati typically offers a range of luggage options for the Multistrada V4 Rally, including side panniers and top cases, all designed to integrate seamlessly with the motorcycle's styling and functionality.

Technology and Safety

- **Rider Aids:** The Multistrada V4 Rally comes loaded with Ducati's latest rider aids, including multiple riding modes (Sport, Touring, Urban, and Enduro), Cornering ABS, Traction Control, Wheelie Control, and a sophisticated Radar system that supports Adaptive Cruise Control and Blind Spot Detection.
- **Connectivity:** A high-resolution TFT dashboard provides access to the motorcycle's systems and settings, and supports smartphone connectivity for navigation, calls, music, and more through the Ducati Connect app.
- **LED Lighting:** Full LED lighting with Ducati's Cornering Lights system enhances visibility in all conditions, while the lights adjust to illuminate the road ahead based on the bike's lean angle.

Design and Styling

- The Multistrada V4 Rally continues Ducati's tradition of striking design, with an aggressive stance that's both functional and aesthetically pleasing. It's built to look as good on urban streets as it does on remote trails, with a design that reflects its versatile capabilities.

Price and Availability

- As a premium adventure touring model, the 2023 Ducati Multistrada V4 Rally comes with a premium price tag, reflecting its advanced technology, performance, and versatility. Pricing is dependent on market, dealer location, and optional packages or accessories.

The 2023 Ducati Multistrada V4 Rally is an embodiment of Ducati's engineering prowess, offering an unparalleled blend of performance, comfort, and technology in the adventure touring segment. It caters to riders who seek the thrill of exploration without boundaries, delivering an experience that's as rewarding on long highway stretches as it is on challenging off-road trails.

2023 Triumph Tiger 1200 GT Explorer | \$28,195

The **Triumph Tiger 1200 GT Explorer** is a formidable entry in the adventure-touring motorcycle segment, offering an impressive blend of performance, comfort, and technology. This model is part of Triumph's comprehensive Tiger 1200 lineup, which has been significantly updated to enhance its appeal to both off-road adventurers and long-distance tourers. The GT Explorer variant is tailored more towards long-distance pavement touring with some off-road capability,

distinguishing itself with a larger fuel tank and additional features aimed at enhancing its touring prowess.

Engine and Performance

- **Engine:** The heart of the Tiger 1200 GT Explorer is a powerful 1,160cc inline-three engine, designed to deliver a strong and linear torque curve. This engine configuration is unique in its segment and is celebrated for its character, smoothness, and distinctive sound.
- **Power Output:** Triumph has tuned this engine to produce ample power and torque, with figures around 148 horsepower and 130 Nm (96 lb-ft) of torque, ensuring robust performance across a wide range of riding conditions.
- **Transmission:** The motorcycle is equipped with a 6-speed gearbox that includes a Triumph Shift Assist for clutchless up and down shifts, enhancing the riding experience on both highways and trails.

Comfort and Convenience

- **Fuel Capacity:** One of the key features of the GT Explorer variant is its larger fuel tank, with a capacity of approximately 30 liters (7.9 US gallons), providing an extended range that's ideal for long-distance tours.
- **Suspension:** The GT Explorer comes with Showa semi-active suspension, allowing for automatic adjustments to damping settings based on the riding conditions and rider preferences, ensuring optimal comfort and handling.
- **Seating and Ergonomics:** A focus on rider and passenger comfort is evident, with an ergonomically designed seat, adjustable windscreen, and intuitively placed controls. The motorcycle's ergonomics are designed to accommodate long hours in the saddle without fatigue.

Technology and Safety

- **Rider Aids:** The Tiger 1200 GT Explorer is equipped with a comprehensive suite of electronic rider aids, including cornering ABS, traction control, several riding modes (including a customizable rider mode), and hill hold control, all of which enhance rider confidence in various conditions.
- **Connectivity:** A sophisticated 7-inch full-color TFT display serves as the motorcycle's information hub, offering Bluetooth connectivity for smartphone integration, allowing for navigation, call and music control, and more.
- **Lighting:** Full LED lighting with daytime running lights improves visibility, and the bike may include adaptive cornering lights that illuminate bends in the road as the bike leans into them.

Design and Styling

- The Triumph Tiger 1200 GT Explorer features a design that's both rugged and refined, with a distinctive stance that reflects its adventurous spirit and touring capabilities. The design includes practical elements like a robust engine guard and comprehensive fairing for protection against the elements and off-road debris.

Price and Availability

- As a premium offering in the adventure-touring segment, the Tiger 1200 GT Explorer comes with a price that reflects its extensive list of features, advanced technology, and premium build quality. Prices vary by market and dealer, so potential buyers should check local listings for the most accurate pricing.

The 2023 Triumph Tiger 1200 GT Explorer is designed to cater to riders seeking a high-performance, technologically advanced motorcycle that can comfortably tackle long-distance rides across a variety of terrains. With its unique three-cylinder engine, extensive range, and sophisticated electronics package, it stands out as a compelling choice in the competitive adventure-touring market.

2023 BMW R 1250 GS | \$26,933

The **BMW R 1250 GS** continues to stand as a pinnacle in the adventure motorcycle segment, further solidifying its position with advancements in technology, performance, and comfort. Known for its unparalleled versatility, the R 1250 GS is equally adept at handling rough off-road trails as it is cruising on the highway or navigating urban environments. This model retains the core elements that have made the GS

lineage legendary among motorcycle enthusiasts while incorporating modern features that enhance its all-around capability.

Engine and Performance

- **Engine:** The heart of the R 1250 GS is BMW's renowned 1,254cc air/liquid-cooled Boxer twin engine, featuring the ShiftCam technology which varies the valve timing and valve stroke on the intake side, enhancing both performance and efficiency across the rev range.
- **Power Output:** This engine delivers a robust output of 136 horsepower and 143 Nm (105 lb-ft) of torque, providing ample power for spirited riding, whether on paved roads or off the beaten path.
- **Transmission:** The bike comes equipped with a 6-speed transmission, finely tuned to match the engine's power characteristics. An optional Gear Shift Assistant Pro allows for smooth up and down shifts without the need for clutch engagement, further enhancing the riding experience.

The 2023 BMW R 1250 GS continues to stand as a pinnacle in the adventure motorcycle segment, further solidifying its position with advancements in technology, performance, and comfort. Comfort and Convenience

- **Riding Modes:** Multiple riding modes adapt the bike's performance to various conditions, including "Eco" mode for optimized fuel efficiency, "Rain" and "Road" for everyday riding, and "Dynamic" and "Enduro" for more spirited or off-road adventures, respectively.
- **Suspension:** The R 1250 GS features BMW's Telelever front and Paralever rear suspension system, offering outstanding handling characteristics and comfort. The optional Dynamic ESA (Electronic Suspension Adjustment) automatically adjusts the damping based on riding conditions and maneuvers.
- **Ergonomics:** Ergonomic design ensures rider comfort over long distances, with adjustable seat height, handlebar positioning, and windscreen to accommodate riders of various sizes and preferences.

Technology and Safety

- **Connectivity:** A full-color TFT display provides access to navigation, ride data, connectivity options, and more, allowing for smartphone integration through the BMW Motorrad Connected app.

- **Rider Assistance Systems:** The R 1250 GS is outfitted with an array of safety features, including ABS Pro, Dynamic Traction Control (DTC), Hill Start Control, and the optional Riding Modes Pro which adds features like Dynamic Brake Control and engine drag torque control.
- **Lighting:** LED lighting is standard, offering excellent visibility in all conditions. An optional adaptive headlight pivots into turns, illuminating the road ahead more effectively during night riding.

Design and Styling

- The R 1250 GS's design is both functional and iconic, with a rugged appearance that signals its adventure-ready capabilities. The bike is available in several color schemes and special editions, allowing riders to choose a look that best fits their style.

Price and Availability

- As a premium adventure motorcycle, the 2023 BMW R 1250 GS commands a premium price that reflects its advanced technology, high-quality components, and unmatched versatility. Pricing can vary based on the market, dealer location, and selected options and packages.

In conclusion, the 2023 BMW R 1250 GS continues to define the adventure motorcycle category, offering an exceptional blend of performance, technology, and comfort. Its ability to excel in a wide range of riding conditions, combined with BMW's commitment to innovation and quality, ensures its place as a top choice for riders seeking the ultimate in adventure touring capabilities.

Getting ready for a new riding season, a quick refresher:

Group riding on motorcycles requires careful coordination and adherence to safety practices to ensure a smooth and secure experience for all participants. Here are some best practices:

Pre-Ride Meeting: Before we ride, all riders will gather for a pre-ride meeting. We will discuss the route, any potential hazards, hand signals, and formations.

Ride Leader and Tail: Depending on the how many rider attend, we will break into group of 6 -7 riders as needed. Lead Rider will set the pace and signal direction changes. We will assign a tail rider for the back of the group to ensure no one gets left behind.

Formation: Maintain a staggered formation while riding, allowing adequate space between bikes. This formation provides better visibility and reaction time. Do not ride side by side.

Gap will increase as speed increases

Communication: We communicate primarily via CB Radio (channel 33), many rider also use Sena 50S mesh as well. Signals for hazards, turns, and stops should be clearly understood by all riders.

Speed and Distance: Your Lead will set a pace comfortable for everyone in the group. Always ride your ride.

Respect Traffic Laws: Follow all traffic laws and regulations. This includes speed limits, signaling, and lane changes.

Visibility: Wear high-visibility gear and keep headlights on at all times, even during the day. This increases visibility to other motorists.

Be Predictable: Make smooth and predictable movements. Avoid sudden lane changes or erratic riding behavior.

Ride Defensively: Assume other drivers may not see you and be prepared to react to unexpected situations. Scan the road ahead for potential hazards.

Fuel and Rest Stops: We plan regular stops for fuel, rest, and hydration.

Emergency Preparedness: Carry a basic toolkit, first aid kit, and emergency contact information.

Stay Focused: Avoid distractions such as using mobile phones or engaging in lengthy conversations while riding.

Know Your Limits: Ride within your skill level and comfort zone. Don't feel pressured to keep up with faster riders if it compromises your safety.

2024 Scheduled Couples Rides

Special thanks to Jim and Janet Cross for spearheading the couples rides.

May 26 – ride details yet to be determined. It will be a short ride to some special place in the Lower Mainland

June 23 – Mystery Ride – The only person who knows is the organizer. Details to be released at the start of the ride.

July 20 – Nakusp – This ride will take place as part of the Region Ride-In and will be an option as one of the guided rides.

Aug 10 – Drive In Movie Ride – This will take place, weather permitting. An evening ride out to the Twilight Drive-In, the last remaining drive-in theater in the Lower Mainland that will be closing permanently at the end of the season.

Sept 14-15 – Weekend “Totem Ride” – resurrected from our old GWRRA days, a weekend ride over to Vancouver Island, up the coast to Comox with a ferry ride back to Powell River where we will spend the night, then a ride back down the Sunshine Coast.

Please note, all rides are subject to change based on the whims of Mother Nature or BC Ferries.

Please register for these rides on the website:

Whatsapp for Couples

WhatsApp for Couples was started so that you can get together with other couples, and ride when you want and where you want. The Chapter has scheduled 5 destination specific rides for this year, however many of you have indicated you want to ride more.

So here you go feel free to plan away. Use it to find out who's going to ride on the weekend, perhaps a plan a weekend away. The intent is to get everyone together and riding.

Many couple don't like early starts, so schedule a ride later at your leisure. Some of the best ride are those impromptu, destination unknown rides.

To be added to this group just text or email me you cell number, and I'll add you to the group.

MONTANA DISTRICT RALLY

If you have never visited Montana, here is a great chance to see it. The EWMA Montana District Rally is being held in Laurel, Montana this year, just a short distance from two of the best motorcycle roads in the US – Beartooth Pass and Chief Joseph Highway.

Please find attached the registration form and schedule of events for this rally. Host hotel information will be coming shortly. Giselle and I had the pleasure of attending their rally last summer in Dillon, Montana. It was a lot of fun and we made lots of new friends. We expect this will be just as fun.

Don't forget, just a week before (July 19-21) is our own Western Canada Region Ride-In in beautiful Nakusp, BC. Here is the link to register:

<https://wcregion.ca/nakusp-ride-in-july-19-21-2024/>

Thank you all for being members and supporting our great organization.

EAGLE WINGS MOTORCYCLE ASSOCIATION

David Ward

Eagle Wings Motorcycle Association, VP Operations - Canada

Eagle Wings Rendezvous 2nd Annual Rally

This biggest event of the year. Riders from all across North America will gather in Green Bay August 29 - 31st.

Yes there are members from this chapter riding down for the event.
